

ABSTRACT OF THE DISCLOSURE

The invention provides compounds of the formula:

wherein (a) is a single or double bond; W is CH, CH₂, CHCH₃, CCH₃, C(CH₃)₂, C(CH₂)₂ or C(CH₂)₃, provided that when (a) is a double bond, then W is CH or CCH₃, and when (a) is a single bond, then W is CH₂, CHCH₃, C(CH₃)₂, C(CH₂)₂ or C(CH₂)₃; X is CH or N; and Y is H or F, and salts, hydrates, tautomers, pure enantiomers, and enantiomeric mixtures; and a method of treating schizophrenia comprising administering same.
